EXPERIENCE

ACCRETE CONSULTING

Strategy & Operations Analyst

Remote
2025 – Present

- Reverse-engineering legacy SAP logic in Python and SQL to fix duplicate and mis-coded records before S/4HANA
- Owning UAT on SAP FICO for 30+ legal entities moving to S/4HANA, projected to cut month-end close from 10 days to 6
- Built a proof-of-concept on the client's own records, showing their finance team how S/4HANA cuts duplicate FI/CO work
- Ran client communication through discovery, owning every deck, presenting to the finance team and sending daily minutes

NOGXNRE RECORDS

Go-to-Market Manager & Analyst

Los Angeles, CA
2022 – 2024

- Recovered \$1K-\$10K per artist a cycle in unpaid royalties by reconciling BMI, ASCAP and OneRPM statements in Excel VBA
- Built go-to-market strategies for 5 artists' releases, turning each artist's goals, constraints and brand limits into a launch plan
- Grew one release's streams 10X, 100K to 1M in two weeks, by co-designing its paid media campaign with the artist

ZARA

Sales Associate, Store Analytics

Los Angeles, CA
2021 – 2022

- Tracked sell-through across 300+ fast-turning SKUs in Excel to flag top sellers for managers to feature at the front of the store
- Detected stolen, lost and misplaced stock the same day by reconciling daily RFID counts against the store's sales and returns

EMPEIRIA INTERNATIONAL

Account Executive

Milpitas, CA
2019

- Promoted to Team Lead in 4 months, managing AEs selling Verizon plans in Walmart and Best Buy on a 10-sale monthly quota

PROJECTS

FORGE (MCP server generator)

Python · MCP · REST & GraphQL · JSON Schema · pytest · MIT License

September 2026

- Connects an agent to a company's own API from one spec file, replacing the integration code usually written for each customer
- Requires human approval before an agent writes to a customer's system, and refuses any request changed after sign-off
- Tested live on Greenhouse's hiring API and offline on Boulevard's booking API, so it works across vendors, not just one

PREFLIGHT (Python plugin safety gate)

Python · Rust · Pydantic · pytest · GitHub Actions · CI/CD

pip install preflight-gate
July 2026 – Present

- Blocks an untrusted plugin before any of its code runs, checking the tools it declares against the rules the host app sets
- Ships as v0.7.0 on PyPI, so any Python app adds the gate in one install, plus a demo of which plugins it refuses and why
- Gates every merge on 7 CI jobs across 12 OS and Python setups, so no safety check can silently stop running anywhere

STOCKER & GAMBLER (Trading simulation lab)

Python · PostgreSQL / pgvector · XGBoost · scikit-learn · Alpaca · Kalshi

June 2026 – Present

- Backtests a strategy over a full year of market data in 11.1s, so a hunch gets checked in seconds instead of argued over
- Runs multi-agent orchestration across sentiment, prediction, risk and execution agents, logging every decision for audit
- Gates every strategy on paper money until it clears win-rate, drawdown and budget limits, so no untested idea trades live

EDUCATION

LOYOLA MARYMOUNT UNIVERSITY

Bachelor of Business Administration, Entrepreneurship

Los Angeles, CA
2024

Coursework: Financial Accounting · Marketing & Business Communications · Operations & Supply Chain · Strategic Management

Certifications: Bloomberg Market Concepts · DeepLearning.AI Generative UI Agents · AWS Certified AI Practitioner (in progress)
